

**SAMY's AI
Guiding Principles**

1. About this Document

2. Samy's AI Guiding Principles

This document outlines Samy's guiding principles for the responsible and ethical use of AI. It details our commitment to leveraging AI in ways that improve client outcomes, protect data security, and support our team's creativity and expertise. These principles ensure that our use of AI aligns with Samy's values and industry best practices, while driving innovation and maintaining transparency with our clients.

SAMY'S AI GUIDING PRINCIPLES

At Samy, we are committed to leveraging AI responsibly and transparently. These principles guide our teams in using AI to drive innovation, deliver value, and uphold the integrity of our client relationships, all while reflecting Samy's core values.

We encourage open collaboration within our teams to continuously explore the capabilities of AI. By doing so, we ensure that our use of AI remains both cutting-edge and aligned with these core principles.

1. Client-focused innovation

AI is a tool to amplify the quality of the solutions we provide to our clients. Our goal is to use it to create real, measurable value that goes beyond automation. We focus on using AI strategically to elevate the impact of our work, helping our clients lead in their respective industries.

Data protection is fundamental to our operations. We integrate AI while adhering to rigorous data security standards, ensuring that our clients' sensitive information is handled with care and confidentiality.

2. Enhancing human creativity and diversity

Our teams are our most valuable asset. AI serves as a tool to enhance their creativity and expertise, not replace them. We embrace the diverse perspectives within our team and leverage AI to support their unique talents.

We are proactive in addressing bias, ensuring AI-generated outcomes are inclusive and fair by:

- + **Carefully crafting inputs** to avoid embedding bias.
- + **Assessing the data sources behind AI models** to ensure they represent diverse populations.
- + **Reviewing AI outputs** to confirm they meet our high standards across different demographic groups.

3. Ethical, open, and trustworthy use

At Samy, our use of AI is always in line with our ethical standards. We are transparent about how AI contributes to the work we deliver, ensuring clients understand its role in our process. Accuracy and openness are at the core of everything we do.

Our AI approach aligns with our core values:

- + **Deliver excellence.** We focus on delivering solutions that make a tangible difference for our clients, solving their challenges and helping them grow.
- + **Collaborate and empower.** We work hand-in-hand with our clients, ensuring they are informed and empowered at every step of the journey.
- + **Pursue innovation.** We are constantly seeking new opportunities for growth and innovation, while always considering the long-term impact of our work on our clients and the industry.

As AI technology evolves, so will our practices. We regularly review and update these principles, ensuring that our AI usage remains effective, secure, and aligned with our ethical standards. If you have any questions or would like to discuss our AI practices, feel free to contact us at [email].

Thank You
